Crypto payments made easy with industry leaders. Confirmo.net

== Description ==

Enable the future of payments today.

Start accepting cryptocurrency payments with Confirmo, one of the fastest growing companies in crypto payments! We provide a payment gateway used by Forex brokers, prop trading companies, e-commerce merchants, and luxury businesses worldwide. Our clients include FTMO, My Forex Funds, Alza and many more. All rely on our easily integrated solutions, low fees, and top-class customer support.

By accepting crypto payments you open your business to a new revenue stream. Despite being commonly viewed as an investment tool, cryptocurrencies were created as an alternative to centralized, inflationary financial systems, and crypto holders are now looking for businesses which accept their funds. Using Confirmo's WooCommerce plugin is a simple way to do so. Installing it is quick and easy, so choose your preferred method below.

Installing the plugin

WordPress plugins:

1. In your Wordpress dashboard, go to Plugins – Add New, and search for 'Confirmo Cryptocurrency Payment Gateway'. 2. Click Download, and then activate the plugin. 3. In your Wordpress dashboard, go to WooCommerce – Settings – Payments. Click Confirmo. You will be asked to configure the plugin with information generated in your Confirmo account to connect them.

Upload:

1. Download and extract the .zip file. 2. In your Wordpress dashboard, go to Plugins – Add New – Upload Plugin, and upload the extracted folder. Activate the plugin. 3. In your Wordpress dashboard, go to WooCommerce – Settings – Payments. Click Confirmo. You will be asked to configure the plugin with information generated in your Confirmo account to connect them.

FTP or File Manager:

1. Download and extract the .zip file. 2. Copy the extracted contents into your Wordpress installation under wp-content/plugins. 3. In your Wordpress dashboard, go to Plugins – Installed plugins – Confirmo Cryptocurrency Payment Gateway. Activate the plugin. 4. In your Wordpress dashboard, go to WooCommerce – Settings – Payments. Click Confirmo. You will be asked to configure the plugin with information generated in your Confirmo account to connect them.

Connecting the plugin to your Confirmo account:

Create an account at <https://confirmo.net> and then go to Settings – API Keys – Create API key. You will be required to complete an e-mail verification, after which you will receive the API key. Once you have it, go to WooCommerce – Settings – Payments, and enable Confirmo as a payment method. Paste the API key into the respective field. To generate a callback password, return to the Confirmo dashboard and go to Settings – Callback password. You will be prompted to complete a second e-mail verification and then provided with the callback password. Again, paste it into the respective field in WooCommerce – Settings – Payments. Callback passwords help increase the security of the API integration. Never share your API key or callback password with anyone!

Finally, choose your desired Settlement currency. Make sure to save your changes by clicking the button at the bottom. When the plugin is activated, Confirmo will appear as a payment option in your website's WooCommerce checkout. **Congratulations, you can now start receiving cryptocurrency payments!**

== Frequently Asked Questions ==

== How do I get started with Confirmo? ==

Simply register with your email and you're good to go! The setup will guide you how to activate your account. In order to comply with applicable law, we will require certain personal identification documents for verification purposes, and certain information about your business.

== How does the verification process work? ==

We require an iDenfy personal identity verification, along with certain company documents.

== How long does it take to verify an account? ==

Verification is usually done within one business day. This means that an account is typically ready for use the day after all the required documents have been provided.

== Which cryptocurrencies can I accept with Confirmo? ==

We currently support the following cryptocurrencies: BTC, BTC (Lightning), ETH, SOL, LTC, TRX, USDC and USDT.

Would you like to see another cryptocurrency here? Contact us at support@confirmo.net

= How does Confirmo guarantee the exchange rate when I accept crypto but receive fiat?

We guarantee the exchange rate at the time of your transaction, ensuring you receive the exact amount requested. Even with crypto volatility, if you request \$100, you will receive \$100, minus our 0.8% fee.

= How can I withdraw my funds? =

You can withdraw your funds through Settlements and Payouts: **Settlements** are daily, weekly or monthly outgoing transactions to your linked bank account or crypto wallet. Settlements can be used to send Fiat, but also crypto and stablecoins, and work on a set-and-forget basis like traditional standing orders.

Payouts are one-time, on-demand transactions to a crypto wallet. This means they can be only used to send cryptocurrencies, but on an on-demand basis like traditional payment orders.

= What are the fees for withdrawals? =

The fee you will pay for Payouts (one-time crypto withdrawals) is 0.5%. For each payment method a standard network fee applies.

This means that if you send \$100 worth of BTC to your contractor, they will receive \$100 worth of BTC. You will be charged a transaction fee which will be deducted from your USD or EUR balance.

Settlements (recurrent withdrawals) are free, but bank fees apply.
